## SKILLS

**Languages:**  
**Frameworks:**  
**Tools/Platforms:**  
**Soft Skills:**

C++, JavaScript, Python  
 HTML and CSS, Bootstrap, MERN, Next, Streamlit, Pandas, NumPy, Scikit-learn, Matplotlib, Bootstrap, Tailwind CSS, LangGraph, LangChain, FAISS  
 MySQL, MongoDB  
 Friendly, Observant, Empathetic and helpful, Adaptable, Critical Thinking

## WORK EXPERIENCE

**Freelancing**  
*Full Stack Developer*

Jan 2026 - Present

- About:** Architecting a hybrid B2B + B2C marketplace platform with role-based access, product catalog, and checkout systems, supporting 1000+ projected users and scalable transactions.
- Engineering credit-based ledger accounting and order lifecycle pipelines, ensuring 100% transactional consistency and reliable financial tracking.
- Optimizing backend performance using Redis caching, Celery workers, and AWS (EC2, RDS, S3), improving API response times by 40–60% under load.

**Tech Stack used:** Next.js, Django, DRF, AWS, GitHub.

## INTERNSHIP

**MacBease Connections Private Limited**  
*Machine Learning Intern*

Nov 2025 - Present

- About:** Designing and deploying a centralized admin dashboard (React + Node.js), improving data visibility and decision-making efficiency by ~35%.
- Implementing data visualization pipelines and user management systems, reducing manual data processing efforts by ~40%.
- Optimizing application performance through testing and backend tuning, reducing load times by ~25% and improving system reliability.
- Tech Stack used:** Machine Learning, Python, MERN

## PROJECTS

**Aetherion | Frontend | Backend**

Jan 2026 - Present

- Architecting a real-time trading intelligence platform using ML-based market regime detection, improving strategy adaptability and prediction accuracy by ~30%.
- Designing a microservices architecture with real-time data ingestion and WebSocket streaming, achieving low-latency (<200ms) for live market data.
- Developing quantitative analytics modules (risk analysis, liquidity stress, anomaly detection), enabling data-driven trading decisions at scale.

**Tech Stack used:** Python, Machine Learning, Fast API, Django, Flask, React, Kafka, Redis, Mongo DB, My SQL, Docker, Web Sockets

**Neuro Play Engine | Frontend | Backend**

Jan 2026 - May 2026

- Constructing a multi-domain Digital Twin intelligence platform with 200+ execution tasks spanning AI, ML, backend, memory, and deployment systems for behavioral gameplay analysis.
- Engineering an async distributed architecture with 5-stage execution pipelines, BullMQ workers, FastAPI orchestration, and domain-isolated FAISS retrieval systems, enabling deterministic and fault-tolerant AI processing workflows.
- Implementing an ML + GenAI intelligence stack using 8D behavioral embeddings, HDBSCAN clustering, LangGraph agents, and ~28,000 gameplay samples for adaptive simulations and AI-driven coaching insights.

**Tech Stack used:** Python, FastAPI, MERN, LangGraph, FAISS, Machine Learning

## CERTIFICATES

AWS Certified Cloud Practitioner (CLF-C02 2025).  
 Fundamentals of Network Communication – Coursera  
 The Bits and Bytes of Computer Networking

Apr 2026  
 Oct 2024  
 Sep 2024

## ACHIEVEMENTS

- Co-CEO at AniCos Student Organization:**  
Advanced from Volunteer to Board Member to Co-CEO at AniCos Student Organization, showcasing leadership growth over two years.
- Hacker Rank:**  
Secured 5 Stars in various programming Languages.

## EDUCATION

**Lovely Professional University**  
 Bachelor of Technology - Computer Science and Engineering; **CGPA: 6.86**

Phagwara, Punjab  
 Aug 2023 - Present

**FIITJEE Junior College**  
 Intermediate; **Percentage: 83.5%**

Hyderabad, Telangana  
 Jun 2021 - Mar 2023
